

Fractional Go-to-Market

Four moves that produce pipeline. Split into **two halves you can buy separately** — run by one embedded engineer who works inside your business, not on a retainer from outside it.

THE ENGINE · FOUR PILLARS

1 ACTIVATE

The buyers already sitting in your database.

- Email + flagship newsletter
- Dormant database reactivation
- A fresh leads database built from what's yours

2 OWN

Your network, run like an actual channel.

- JVs + power partners
- Direct first-degree connections
- Cold email + LinkedIn outreach

3 FIND

Audiences that don't know you exist yet.

- Podcast placements
- Influencers + YouTube channels
- Co-promoters + events

4 BUILD

A community that compounds every month.

- The community + traffic into it
- A content engine that feeds it
- Your offer, productized

OFFER 1 · PILLARS 1 + 2

Build Your Pipeline

Activate + Own — pipeline from assets you already own

OFFER 2 · PILLARS 3 + 4

Fill Your Pipeline

Find + Build — new audience, turned into a community

BOTH HALVES TOGETHER

Fractional Go-to-Market

\$50,000 in new pipeline · 90 days

Guaranteed — or your industry's equivalent in placements, contracts, jobs, patients or bookings.

WHICH ONE IS YOU?

OPTION 1

Build Your Pipeline

"I have a list, a CRM and a real network — and none of it is producing anything."

You don't have an attention problem. You have an **activation** problem. We turn on what you already own.

OPTION 2

Fill Your Pipeline

"I've worked everyone I know. I need people who've never heard of me."

You've hit the ceiling of your own network. We go borrow other people's — then **build you one**.

SEPARATE TRACK

The Embedded Engineer

"Getting clients isn't my bottleneck. Delivery, ops and internal systems are."

Same engineer, pointed anywhere: software, ops, or marketing. **No pipeline guarantee — it isn't go-to-market.**

HOW EVERY OPTION IS DELIVERED

- ✓ **A real engineer, ~30–35 hrs/week**, embedded in your business
- ✓ **Coaching + on-demand support** — your team comes to us, not to you
- ✓ **A buy-out path** — bring the engineer in-house whenever you want
- ✓ **Architected by us** behind the scenes, in a shared Slack channel
- ✓ **One flat fee** — the engineer's salary included, no payroll or HR
- ✓ **90-day terms** — we map the roadmap, then renew against what's next

INCLUDED IN EVERY OPTION

A dedicated engineer working directly for your business.

THE SINGLE BRAIN

Every tool, system, agent and offer we've built — not just one seat.

NOTHING TO BUY ON TOP

Data, tools and team are all included in the engagement.

Buy a half. Or the whole engine.

A 20-minute call is enough to tell you which one you actually need.
